

Thomas B. Winans

Mr. Winans is an IT management and technology consultant. He assists clients with pre-investment technology diligence, post investment portfolio management, development and implementation of organizational and software production methodologies, distributed service-based application architectures, and performance of project triage.

Tom is an experienced software engineer who has worked and consulted in the telecommunication, manufacturing, and IT industries for over 20 years with companies including Warburg Pincus, Nissan North America, Transition Partners Ltd, Indus International, IGS, Level3 Communications, TRW/BDM, MCI, WilTel, and Compaq Computer Corporation. He received his B.A. in Mathematics and Computer Science with honors from the University of Arizona in Tucson in 1983.
